Thermal Ribbons

All BH Technical Coding & Transfer ribbons fully meet all EU (European) regulations and are approved for contact with foodstuffs, using the latest technology in ribbon manufacturing we can slit ribbons to any width and length and our in house quality system ensures you get high quality ribbon every time.

All BH ribbons have a unique back coating which eliminates friction, reduces wear and prevents build-up of material on the printhead, increasing printhead life.

BH Technical Services Group can supply original Manufacturers grade ribbons or our own high quality in-house brand for all makes of thermal printers.

Thermal Printheads

BH Technical Services can supply a range of replacement thermal printheads to suit most makes of thermal label printers, these include printheads suitable for:

Zebra	Markem	Herbert	Eltron
Avery	Opendate	Citizen	Allen
Datamax O'Neil	Printronic	CAB	Jaguar
Sato	Eltron	Eltron	
Intermec	Cimjet	TSC	
Toshiba Tec	Domino	Monarch	
Ice	Bizerba	Digi	

If you don't see your printer model here, please contact us.

Barcode Scanners/Verifiers

Whether you require a hand held or fixed mount scanner, 1D or 2D Scanner, USB or Wireless scanners try us for all your scanning requirements from all the leading manufacturers.

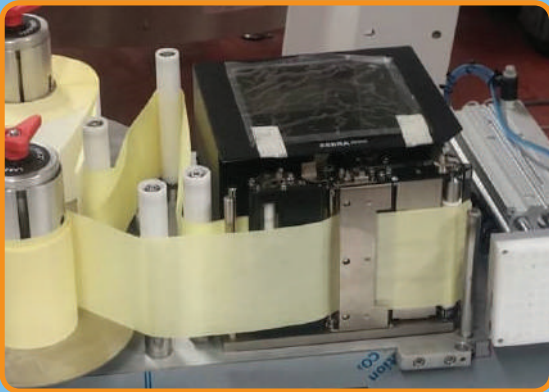

Barcode Verification is the measuring and grading of the quality of a printed bar code in its final configuration. This is carried out to international standards and is particularly useful for quality control purposes. The difference between symbol verification and symbol scanning is that verification measures and grades the quality of a bar code, and can provide information to help diagnose the cause of any problems. Scanning is the process of reading the data from the symbol and it provides no indication of a bar code's quality.

All our Barcode Verifiers fully meet GS1 Standards.

Labels

BH Technical Services can supply a range of high quality, premium self adhesive labels to complement the thermal printer ribbons, giving high quality, superior print. Our Range includes Self-Adhesive metallic and non-metallic papers, pressure sensitive clear, metallic and opaque films combined with a UV flexographic 8 colour press with in-line quality inspection giving our customers high quality labels at competitive prices. Please contact us with your requirements.

Print & Apply Labellers

For a complete range of fully automatic on-line Print & Apply labelling machines for both the simplest and the most demanding of labelling applications.

No matter how big or small the project, If you are looking to automate the process of Printing and Applying Labels, we can provide expert independent advice on Labelling Machines, Solutions, and Systems. We build all our systems in house and can customise to suit most requirements, we use the latest technology from industry leading manufacturers ensuring reliable, efficient, and industrial yet operator friendly systems.

At BH Technical we offer the products and solutions that best solve your particular application no matter the size and complexity of your product.

Label Applicators

We offer a range of fast, reliable and economic labelling machines for all industrial requirements. They are designed to apply pre-printed labels to products accurately every time, with quick changeovers, are easy to use and are low maintenance. No matter what shape your products are we can apply labels to the top, side or underneath using our high quality labelling heads. These machines are robust in nature and use the latest integral electronics, giving optimum performance, we can integrate into your existing line or we can provide a range of conveyors and handling equipment.

Thermal Transfer Printers

BH Technical Services can supply a range of Thermal Transfer Printers from all the leading manufacturers. Being independent suppliers, we can supply the correct printer that best suits your requirements, from leading manufacturers such as ZEBRA, AVERY DENNISON, SATO, INTERMEC, DATAMAX O'NEIL, TOSHIBA TEC, TSC and PRINTRONIX to name a few.

We have many years experience with different software packages and printers, we can advise on the best solution and installation method to ensure maximum productivity from your label printer.
